

Economic Overview And Outlook: Missouri

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Missouri by 62,000 jobs through the 3rd quarter of 2010.
- In Missouri, private sector employment fell by 6.4 percent from December 2007 to December 2009. In 2010, private sector employment contracted by 0.7 percent.
- In Missouri, employees in the mining, construction, and manufacturing sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Missouri experienced the greatest employment increases: mining; other services; and leisure and hospitality.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Missouri was 9.4 percent in November 2010, up 4.1 percentage points from December 2007, but down from its most recent peak of 9.7 percent reached in October 2009.
- 283,000 Missouri residents were counted among the unemployed in Missouri during November 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 2.2 percent. Most recently, in the 3rd quarter of 2010, total personal income remained 0.6 percent below the 2nd quarter 2008 peak.

- Real per capita personal income (in 2005 \$) in Missouri was \$33,003.70 in the 3rd quarter of 2010, down from \$33,117.50 in the 3rd quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw a decrease of 3.9 percent in October 2010 from October 2009 compared to a 2.4 percent decrease in September. In Missouri, home prices saw a decrease of 6.8 percent in October 2010 from October 2009 following September's year over year decrease of 5.7 percent.
- The median price of single-family homes in Missouri was \$123,754 in the second quarter of 2010, compared to \$180,176 nationwide.
- As of the 3rd quarter of 2010, 1.9 percent of all mortgages, including 6.6 percent of subprime mortgages, were in foreclosure in Missouri.
- Housing starts in Missouri totaled 6,380 units (seasonally adjusted annual rate) in October 2010, a decrease of 30.7 percent from September.
- Within the Midwest census region, which includes Missouri, sales of new single-family homes totaled 39,000 units in October 2010, a decrease of 20.4 percent from September. Sales of existing single-family homes decreased 1.1 percent to 860,000 units (at seasonally adjusted annual rates) from September to October 2010.

How Does Missouri Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Missouri to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Missouri over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Missouri.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

STATE QUICK FACTS

		Missouri	United States
Unemployment Rates	November 2008	7.2%	6.9%
	November 2009	9.6%	10.0%
	November 2010	9.4%	9.8%
